Proposal for China Study Center

Pakistan and China are not only brothers. Before CPEC was proposed, I led my team to launch an investment project in Pakistan. Now we finally registered 9 companies in Pakistan with Chinese businessmen from all fields.

Chinese literature, culture, history, philosophy, politics, governance and diplomacy were my major classes since my bachelor degree. I studied Pakistan history and economy in Pakistan.

I am well aware of the difficulties and bottlenecks encountered in development of CPEC. I have good Chinese academic and government resources and can hold the fruitful dialogue and cooperation between both sides.

I have my own passion and faith for CPEC and Pakistan. During my time in Pakistan, I totally learned the different logic and process in Pakistan and treat Pakistan as my second hometown.
